AWARDS

ACHIEVEMENT

Delivered 10+ production-ready web applications for international clients with a focus on Laravel + Vue.js.

PROJECTS

FXBotExperts, (Laravel, Livewire) [Link](#)

- Worked on a trading platform providing automated Expert Advisors (EAs) for MetaTrader 4 & 5.
- Developed backend features and modular dashboards using **Laravel** and **Livewire**, ensuring scalability for real-time trading data.
- Implemented secure data handling workflows and optimized database queries for high-frequency updates.

Weqayah, (Laravel, Livewire) [Link](#)

- Contributed to a government-mandated fire monitoring system in Ajman.
- Developed backend services to connect IoT-enabled fire alarms to a 24/7 central monitoring platform with automated alerts.
- Ensured high reliability and low-latency processing for mission-critical real-time data.

Pakistan Cooling Center, (Laravel, Vue.js, Tailwind CSS) [Link](#)

- Built a full-featured eCommerce platform for air conditioning and cooling solutions.
- Implemented product, flows, and responsive interfaces with optimized frontend performance.
- Designed a scalable backend supporting dynamic inventory and order management.

MedexCore, (Laravel, Vue.js, Tailwind CSS) [Link](#)

- Developed a healthcare management system to streamline patient records, appointments, and operations.
- Built secure CRUD operations, optimized database queries, and designed modular components for maintainable code.
- Ensured compliance with data privacy standards and high system reliability.

HOLOIN, (Laravel, React.js, IoT) [Link](#)

- Worked on an IoT platform for sensor deployment and management.

- Built backend modules and real-time monitoring interfaces to enable efficient sensor data collection and visualization.

Tramm Law Firm, (GoHighLevel, HTML, Tailwind CSS, JS) [Link](#)

- Developed a high-converting landing page inside GoHighLevel with HTML and Tailwind-styled UI.
- Integrated webinar registration forms, modal flows, and conversion-focused features.
- Optimized performance, responsiveness, and smooth user experience.

OdChat, (Laravel, Vue.js, WebSockets)

- Built a real-time interactive chatbot platform similar to Tawk.to.
- Implemented live messaging, user management, and backend API integration for seamless communication.

Gulf Cars4u, (Laravel, Vue.js) [Link](#)

- Developed a car marketplace platform with full frontend and backend integration.
- Handled API-based data exchange, database optimization, and responsive UI development.
- Ensured smooth user workflows for buying and selling vehicles online.

SKILLS
